

Vanessa Dunu

DATA ANALYST

434-326-3371 · vanessa.dunu@gmail.com · github.com/vanessadunu-lab · linkedin.com/in/vanessadunu324

SUMMARY

Analyst experienced in turning complex research questions into structured data analyses and clear visual findings, with a scientific background and firsthand clinical experience. Proficient in SQL, Excel, Tableau, and Python, with experience wrangling data, iterating on analyses, and communicating findings to interdisciplinary research teams. Brings strong attention to detail and an understanding of clinical workflows to healthcare analytics.

TECHNICAL SKILLS | SQL · Tableau · Excel · Python · Data Cleaning · Data Analysis · Data Visualization

DATA ANALYTICS PROJECTS

Home Health Agency and Medicare Utilization Analysis ([GitHub](#)) | SQL · Tableau

- **Analyzed ~124K CMS Medicare home health records to identify variation in utilization and payment** across states, admission source/timing, comorbidity, and providers using PostgreSQL.
- **Built a reproducible data retrieval and preparation workflow** by extracting data through the CMS Open Data API with Python, documenting data-cleaning decisions, and loading the prepared dataset into PostgreSQL.
- **Developed an interactive Tableau dashboard** translating utilization, charge, and payment analysis into four stakeholder-focused visualizations for Provider Operations and Care Management review.

WORK EXPERIENCE

Ophthalmic Technician/Surgical Coordinator | Charlottesville Eye Associates - Virginia | *May 2026 - Present*

- **Coordinated time-sensitive preoperative workflows for weekly ophthalmic surgeries** by reviewing patient documentation in EMA and UVA Epic to identify missing EKGs, laboratory results, and medical clearances.
- **Reviewed and validated patient records and surgical documentation** for completeness by communicating with patients, physicians, primary care offices, and clinical teams to resolve discrepancies and prevent delays.
- **Managed patient referrals, scheduling, follow-up communication, and documentation across multiple clinical teams** through EMA, WestFax, and physician offices to support ophthalmic patient care and diagnostic testing.

Restorative Support Specialist & Intern | Latisha's House Foundation - Williamsburg, Virginia | *Sep 2025 - May 2026*

- **Enhanced the evaluation of program eligibility** by conducting structured intake assessments to review documentation with the team before onboarding a resident into the program.
- **Documented and communicated key information (resident progress on individual goals, program participation, etc)** in Google Docs and Google sheets to support internal reporting and improvement in services offered by the foundation.

Research Assistant (Data Collection/Analysis) | Moving with Climate Change - William & Mary | *Jan 2025 - May 2026*

- **Ensured accuracy and consistency across data sets** by performing data validation and preprocessing to enable the team in determining which relationships and analyses would be most valuable to assess.
- **Strengthened understanding of biometric data** by analyzing relationships between physiological signals (heart rate) using Excel and Jamovi to report to the team on emotional connection across workshops.

Undergraduate Researcher | Mechanochemistry/NSF REU Program - William & Mary | *Feb 2024 - Jan 2025*

- **Identified inefficiencies in product collection** by analyzing experimental results to determine limitations in the existing reaction-vessel design.
- **Improved product recovery** by redesigning the reaction vessel into two interlocking halves using AutoCAD and 3D printing, allowing easier access to products after the reaction.

CERTIFICATION | CITI Program – Social & Behavioral Research (Human Subjects Protection & IRB Compliance)

EDUCATION | B.S. Neuroscience | College of William & Mary | **2022 - 2026**
